

ClinicOne

Clinic management system

Anjana Dissanayaka
Hiruni Sawbhagya
Senuri Rathnayaka

Introduction

- High patient flow in government clinics
- Manual record handling
- Difficult managing patient data
- Time-consuming processes

| Key Problems

- Paper-based records can be lost/damaged
- No quick access to patient history
- Long waiting times for patients
- Poor coordination between staff

| Why This System?

- Need for digital data management
- Faster access to medical records
- Better clinic organization
- Improved patient experience

Proposed System

ClinicOne

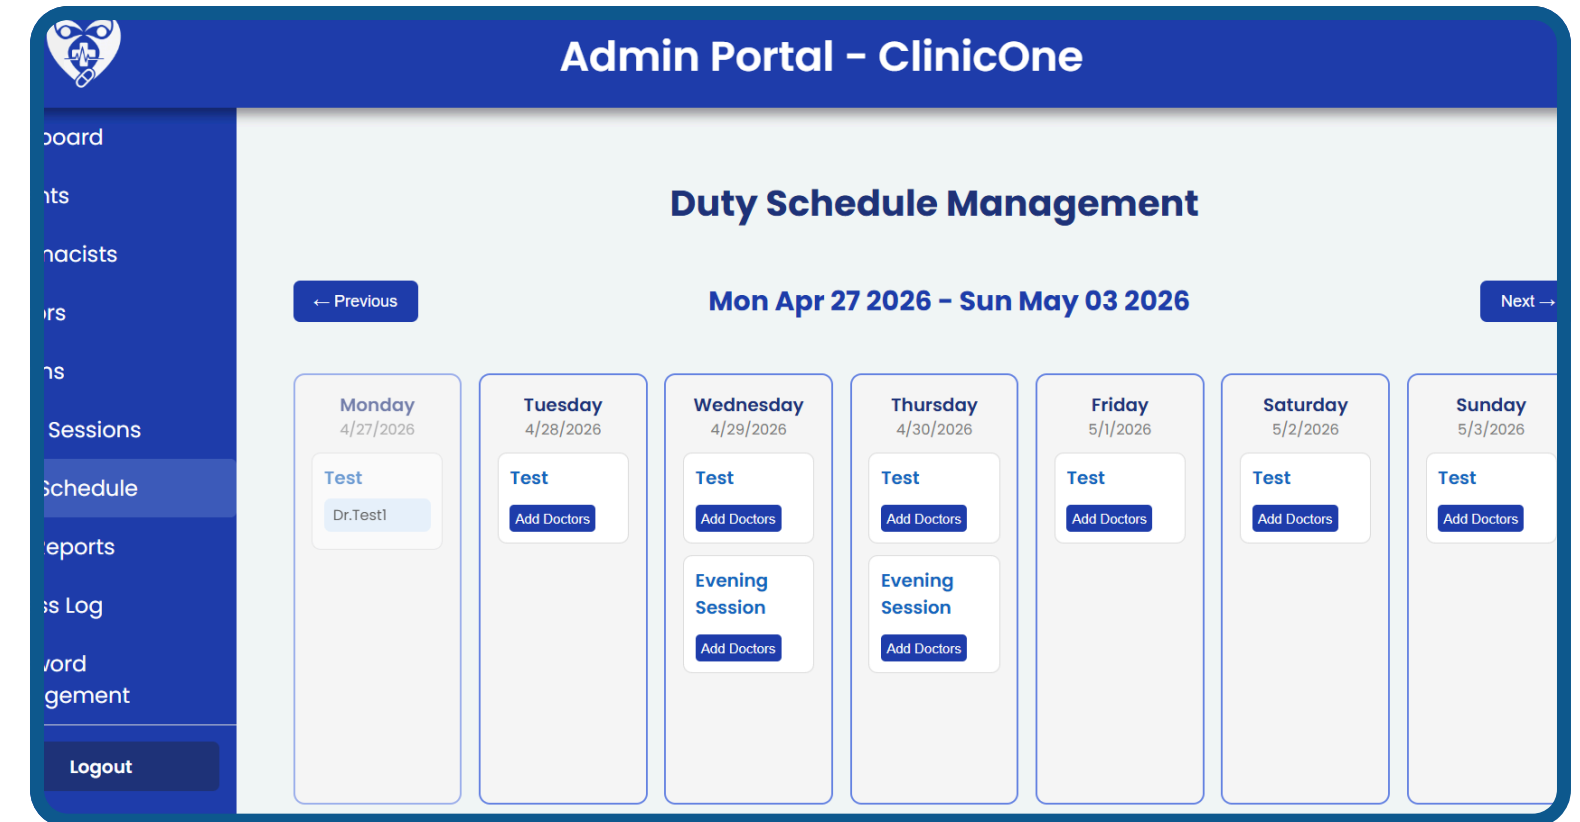

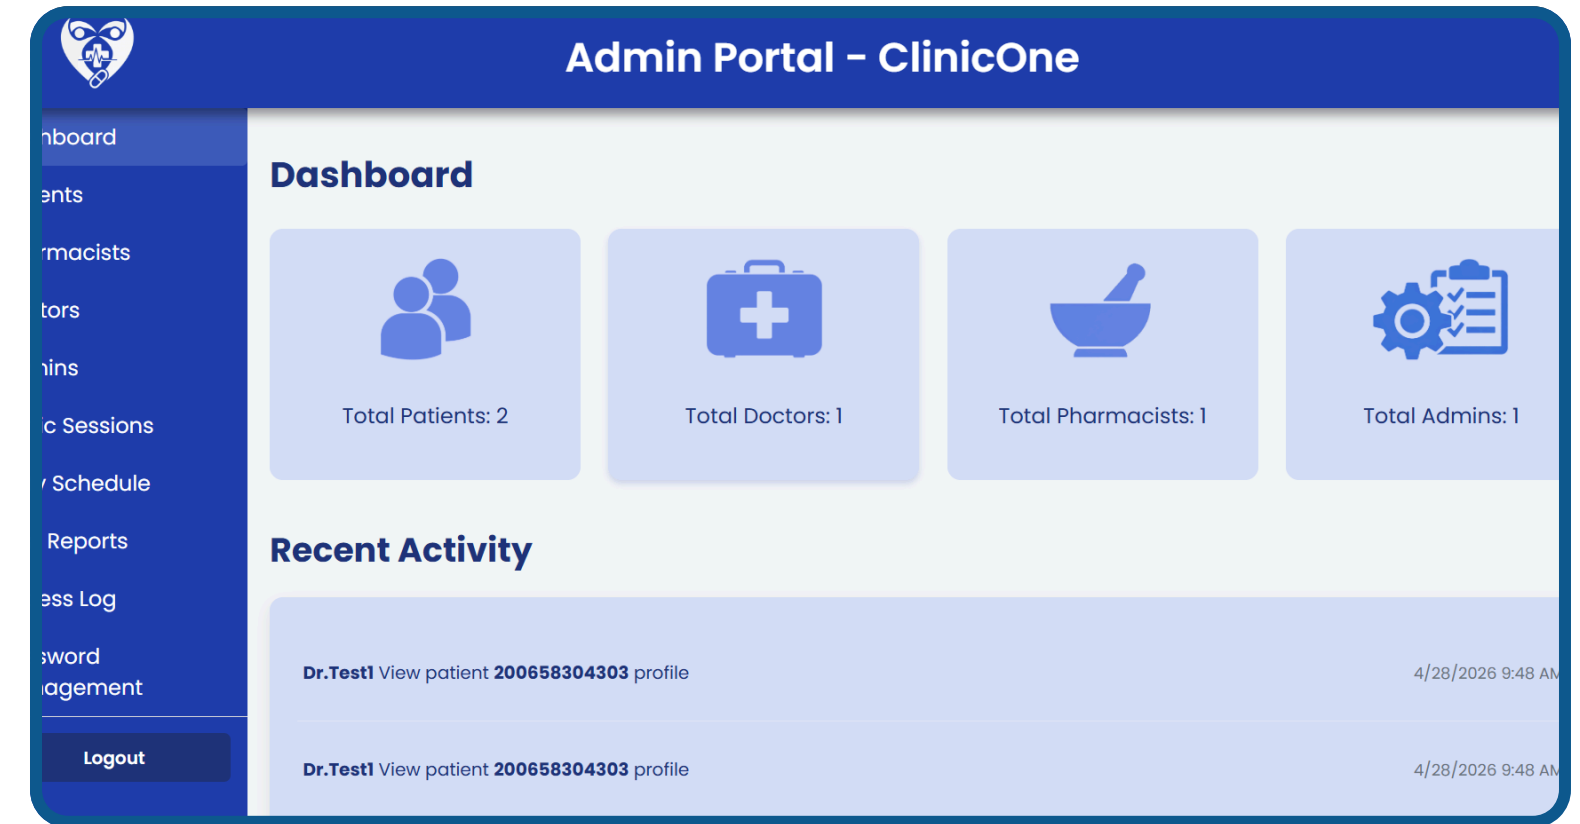

- Centralized clinic management system
- Digital patient records
- Role-based access (Admin, Doctor, Patient, Pharmacist)
- Improved workflow and communication

| System Overview

- Admin Portal
- Doctor Portal
- Patient Portal
- Pharmacist Portal

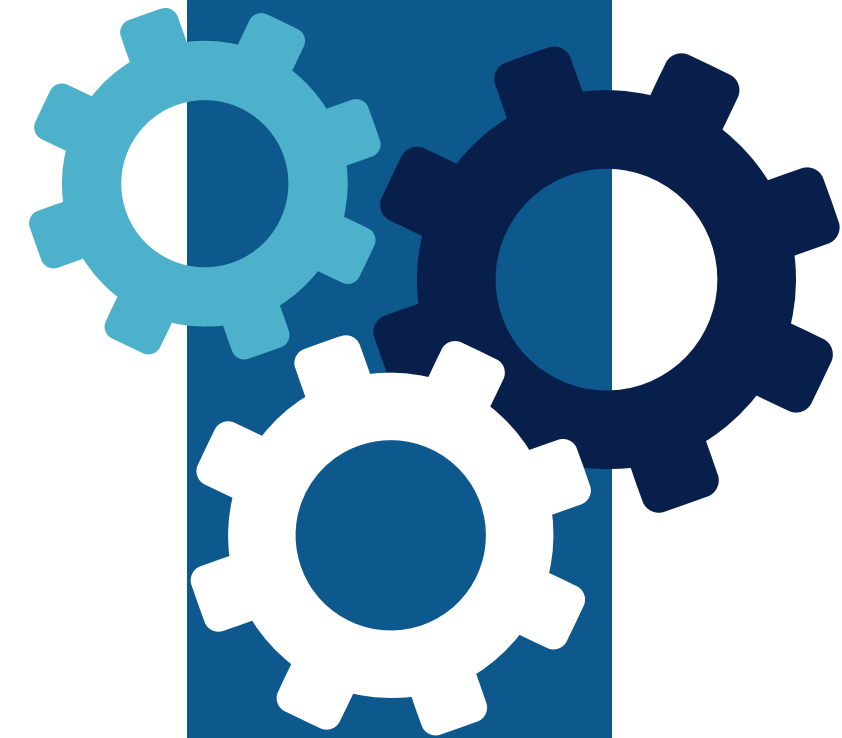

Admin Portal

- Patient & staff registration
- Upload medical reports
- Manage clinic sessions
- Assign doctors to schedule
- Access log monitoring

Doctor Portal

- Access patient medical profiles
- View reports & history
- Prescribe medicines & tests
- Schedule clinic sessions
- Track patient progress

| Patient Portal

- View medical records
- Check prescriptions
- View clinic sessions
- Receive notifications
- Track health progress

Pharmacist Portal

- Search patient by NIC
- View prescriptions
- Update medicine status
- Generate external prescriptions

| Key Features

- Clinic session scheduling with time slots
- View prescriptions
- Update medicine status
- Generate external prescriptions
- Generate external prescriptions
